

SCHROFF MTCA.4 & ATCA PRODUCTS

MAY 29, 2014

KEK, JAPAN

Dietmar Mann / Ralf Waldt

Pentair / Schroff GmbH

dietmar.mann@pentair.com / ralf.waldt@pentair.com

OVERVIEW

Crates:

- MTCA.4 crate with 7 AMC slots for laboratory and deployment use
- MTCA.4 Deployment crate for 12 AMC slots, front to rear cooling
- MTCA.4 Deployment crate for 12 AMC slots, bottom to top cooling
- MTCA.4 Deployment crate 2U 6-Slot
- MTCA.0 Small form factor modular crate for one or two AMC modules
- ATCA 6-Slot AC-DC
- ATCA 14-Slot AC

Accessories

- MTCA.4 Filler / Blocker Modules
- Front panels and handles

Simulation and testing

Schroff MTCA.4 Products

MTCA.4 crate with 7 AMC slots for laboratory and deployment use

- **Front:**
 - 6 x AMC slots double-wide, mid-size
 - 1 x AMC slots double-wide, full-size
 - 1 x PM (Power Module) Slot
 - 1 x MCH slot
- **Rear:**
 - 6 x RTM slots double-wide, mid-size
 - 1 x RTM slots double-wide, mid-size
- **Hot Swappable CU (Cooling Unit) including removable air filter**
- **Application: development system in various laboratories including DESY , SLAC and CERN**
- **Order information: Schroff P/N 11850-021**

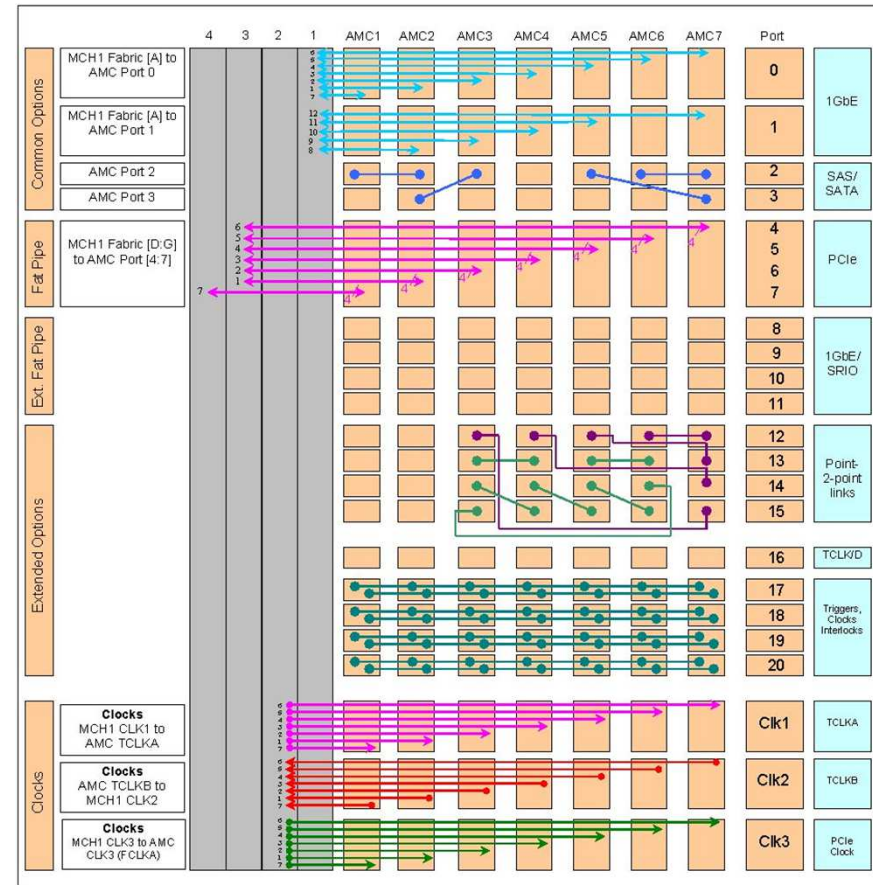

Schroff MTCA.4 Products

MTCA.4 crate with 7 AMC slots for laboratory and deployment use

Backplane topology

- Common Options: 2 x GbE to all AMC slots
 - Direct SATA links between AMC slots
 - PCIe x4 between MCH and AMC slots
-
- Point-to-Point links
 - Bussed links for Clock and Trigger signals
-
- TCLKA
 - TCLKB
 - PCIe clock

Schroff MTCA.4 Products

MTCA.4 crate with 7 AMC slots for laboratory and deployment use

- Side-by-side mounting kit for 19"-Rack installation

- Air flow: bottom intake, top exhaust

Schroff MTCA.4 Products

Deployment crate for 12 AMC slots

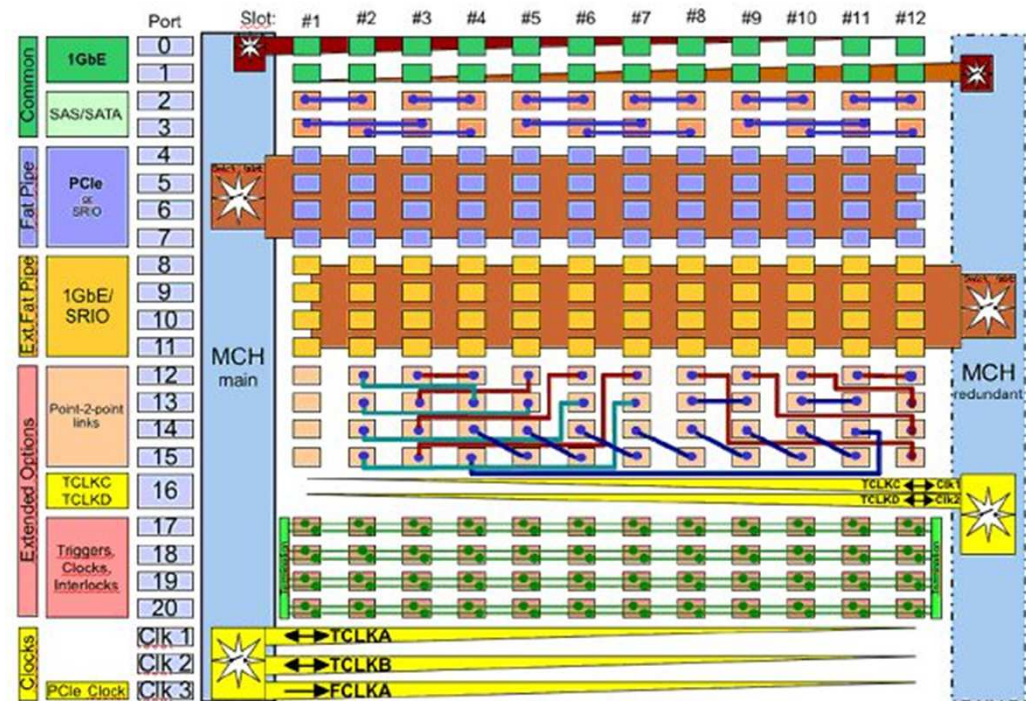

- **Front Module Slots:**
 - 12 x AMC slots double-wide, mid-size
 - 4 x PM (Power Module) Slot
 - 2 x MCH slot
- **Rear Module Slots:**
 - 12 x RTM slots double-wide, mid-size
- **19" wide x Height 9U**
- **Push-Pull cooling with front removable fan trays**
- **Front removable Air filter**
- **Air flow front bottom air intake, to rear air exhaust**
- **Order information: Schroff P/N 11850-026**

Schroff MTCA.4 Products

Deployment crate for 12 AMC slots, Backplane topology

- Common Options: 2 x GbE to all AMC slots
- Direct SATA links between AMC slots
- PCIe x4 between MCH and AMC slots
- Point-to-Point links
- Bussed links for Clock and Trigger signals
- TCLKA from MCH 1
- TCLKB from MCH 1
- TCLKC from MCH 2
- TCLKD from MCH 2
- FCLKA from MCH 1
- PCIe clock

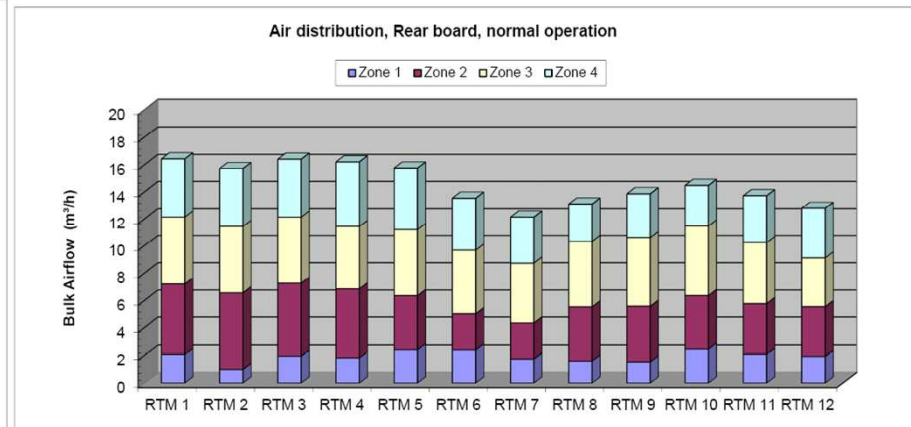

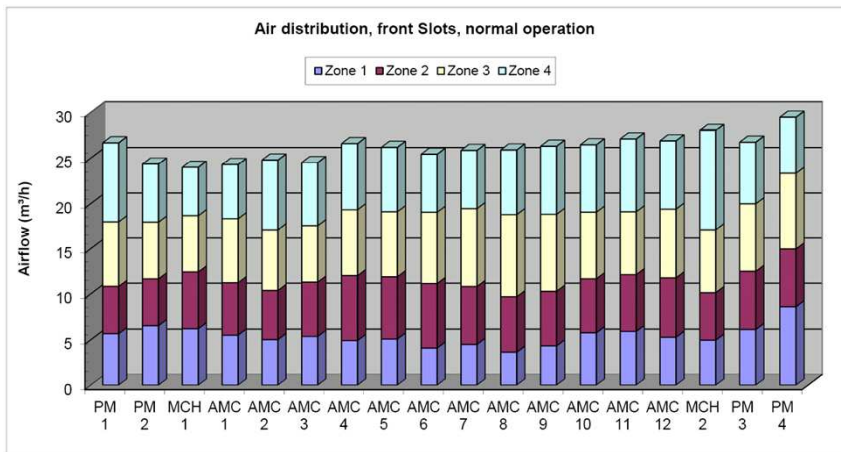

Schroff MTCA.4 Products

Deployment crate for 12 AMC slots

- **Air flow measurements**

- ~ 25 m³/h Front Air flow → > 80 Watts / AMC
- ~ 12 m³/h RTM Air flow → > 40 Watts / AMC

Schroff MTCA.4 Products

Deployment crate for 12 AMC slots

DESY LLRF version

- Based on standard crate 11850-026
- Additional LLRF Backplane for RTM modules
- Customized solution for powerBridge Computer

Photo courtesy of DESY / Germany

Schroff MTCA.4 Products

Deployment crate for 12 AMC slots, CERN

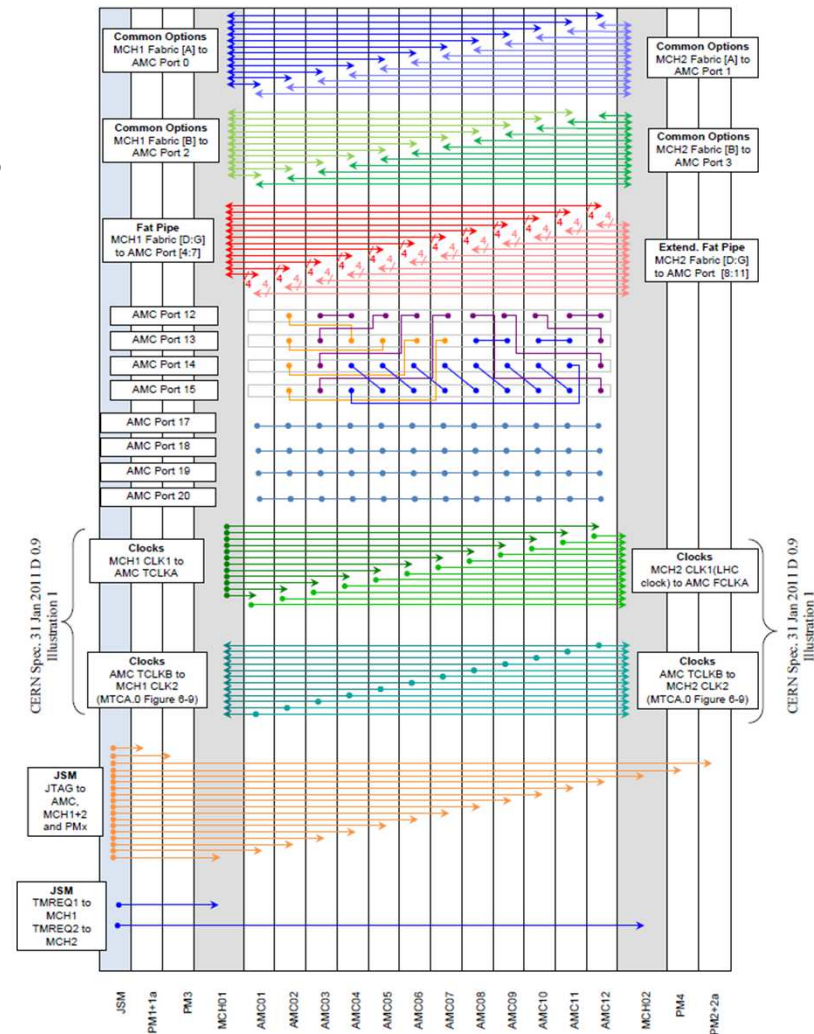

- **Front Module Slots:**
 - 12 x AMC slots double, full-size
 - 2 x single PM (Power Module) slots
 - 2 x MCH slots
- **Rear Module Slots:**
 - 6 x RTM slots double, full-size
 - 4 x single PM (Power Module) slots
 - 1 x JSM (JTAG Switching Module)
- **19" wide x Height 7U**
- **Push-Pull cooling with front removable fan trays**
- **Air flow bottom to top**
- **Front removable Air filter**
- **Order information: Schroff P/N 11890-119**

Schroff MTCA.4 Products

Deployment crate for 12 AMC slots

- Common Options: 2 x GbE From Fabric A to all AMC slots
- Common Options: 2 x GbE From Fabric B to all AMC slots
- PCIe x4 between MCH and AMC slots
- Point-to-Point links
- Bussed links for Clock and Trigger signals
- Clock distribution
- JTAG links from JSM to all slots

Schroff MTCA.4 Products

Compact 2U 6-Slot MTCA.4 crate

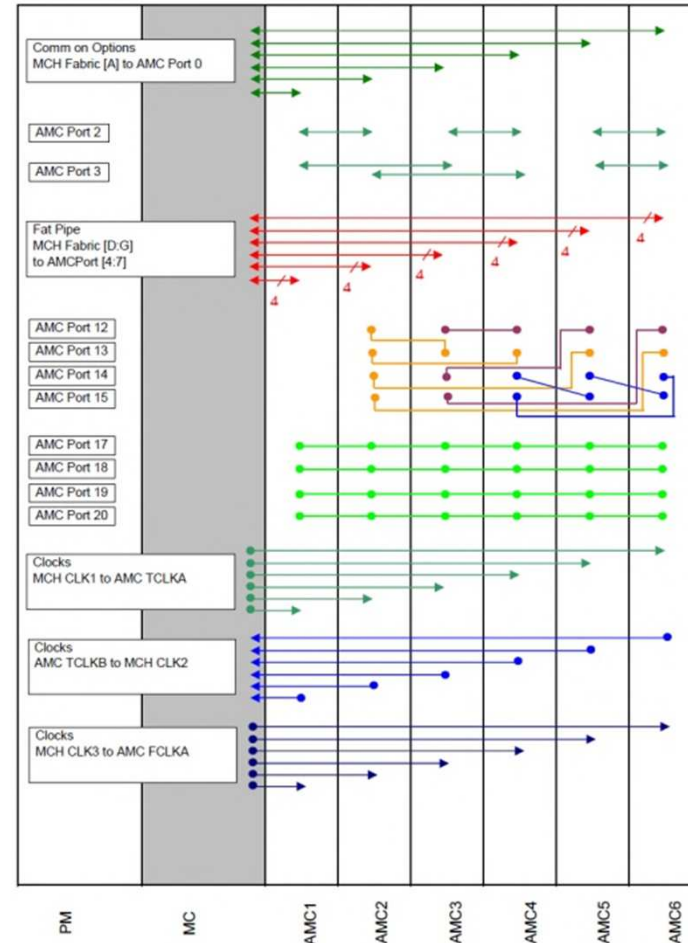

- **Front Module Slots:**
 - 6 x AMC slots double, mid-size
 - 1 x MCA slot
- **Rear Module Slots:**
 - 4 x RTM slots double, mid-size
 - 1 x PM slot
- **Compact: 19" wide x 2U high**
- **Front removable CU including air filter**
- **Two cooling options (with different CUs):**
 - Front to Side
 - Side to Side
- **Customized solution for powerBridge Computer**
- **Order information: Schroff P/N 11890-072**

Schroff MTCA.4 Products

Compact 2U 6-Slot MTCA.4 crate, backplane topology

- Common Options: 2 x GbE to all AMC slots
- Direct SATA links between AMC slots
- PCIe x4 between MCH and AMC slots
- Point-to-Point links
- Bussed links for Clock and Trigger signals
- TCLKA
- TCLKB
- PCIe clock

Schroff MTCA.0 Products

Small form factor modular systems

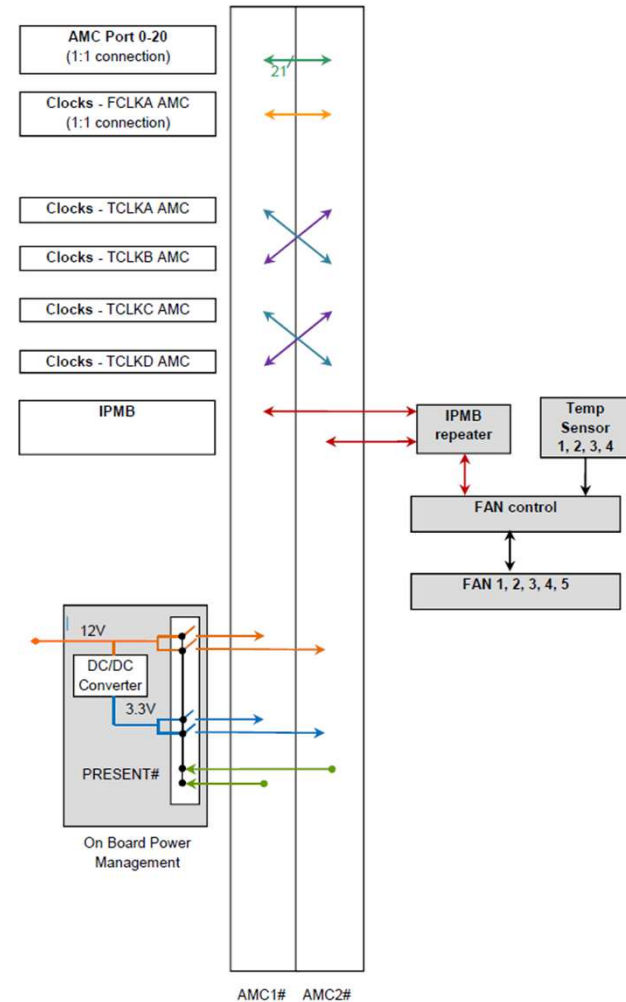

- **AMC 2 Slot System**
 - cooling performance > 100 W
 - Extreme low noise in normal operation
 - Easy removable fan tray and air filter
 - Stackable for lab operation
 - Assembly of mounting plate possible
- **Order information: Schroff P/N 11890-072**
- **Version with built-in MCH in development**

Schroff MTCA.0 Products

Small form factor modular systems, Backplane topology

- 1:1 connection AMC ports 0..20
- Cross connected clock signals
- Fan control circuit
- 12V PP and 3.3V MP

Schroff ATCA Products

- **14U 14 Slot AC Shelves**

- Integrated AC power shelf with up to 3 front pluggable front ends
- 2.7 kW front-pluggable AC Power Supplies with wide range input in a redundant 2+1 configuration
- Electrical Power = 300 W/slot
- The Power Distribution Board (PDB) (1) is located behind the AC PSUs. It provides 3 connectors for the PSUs
- Power distribution is divided into 4 branches. The branches are protected by 40 A fuses

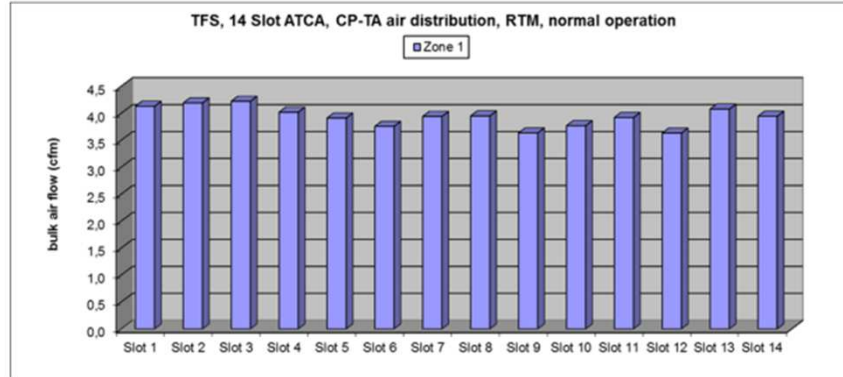

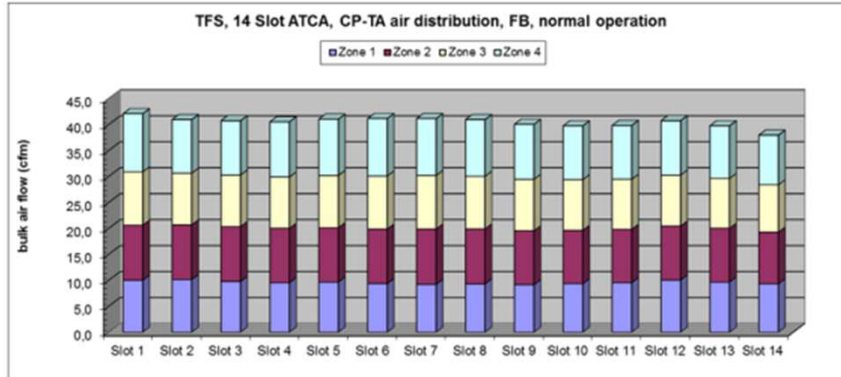

14U 14 Slot Shelf (AC Version)

Power Distribution Concept

Schroff ATCA Products

	Zone 1 [cfm]	Zone 2 [cfm]	Zone 3 [cfm]	Zone 4 [cfm]	Σ [cfm]	Σ [m³/h]
Slot 1	10,0	10,6	10,3	11,2	42,1	71,6
Slot 2	10,1	10,6	9,9	10,3	41,0	69,6

Slot 10	3,8	3,8	6,4
Slot 11	3,9	3,9	6,7
Slot 12	3,6	3,6	6,2
Slot 13	4,1	4,1	6,9
Slot 14	3,9	3,9	6,7
Σ	55,1	55,1	93,7

Schroff ATCA Products

- **6U 6 slot combined AC/DC Shelf – side to side cooling**

- 6U 6 slot, triple replicated mesh with bussed or radial IPMI
- Optional Dual Star Backplane with support for DDS Blades
- Side to side cooling (right to left) with redundant fan trays in push-pull configuration
- AC or DC option can be realized with the same chassis by having either
 - AC-Power Supply-PEMs
2.7 kW front-pluggable AC Power Supplies with wide range input in a redundant 2+2 configuration
 - Dual DC PEMs (-48VDC)

first mockup tests have shown a bulk airflow of approx. 1000 m³/h (approx. 590 cfm)

DC Option
Blind panel covering PSU area

AC Option
with 4 PSU; 2,7KW each
(2+2 Redundancy)

DC PEM option

AC Power entry

DC PEM Detail

AC PEM Detail

Schroff MTCA.4 Products

MTCA.4 Filler / Blocker Modules

Rear Module

Front Module

Schroff MTCA.4 Products

Front panels and handles

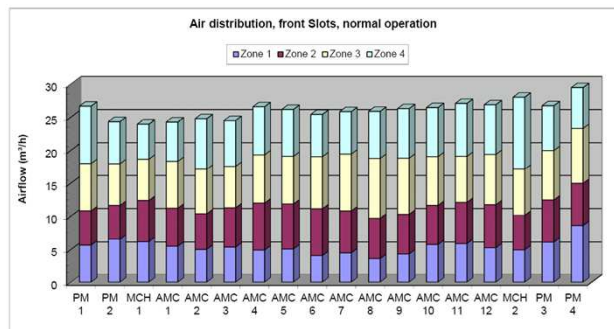

- **Complete kits:**
 - Front panel
 - Handles
 - Light pipes
 - EMC gasket
- **All sizes:**
 - Single / Double
 - Compact / mid / full size

Schroff MTCA.4 Products

Simulation and Testing capabilities

- Thermal simulation
- Climate chamber
- Wind tunnel air flow measurements
- Air distribution measurements
- Acoustic noise measurements
- Backplane simulation and measurement
- Conducted Emissions

Schroff MTCA.4 Products

PICMG TCA-IW → Interoperability Workshop

- Module and crate manufacturers test the interoperability of their products
- Test matrix defines „who tests with who“
- Last TCA-IW workshops:
 - Schroff, Straubenhardt / Germany in September 2013
 - DESY, Hamburg / Germany in April 2014
 - MTCA.4 crate manufacturers
 - MTCA.4 AMC manufacturers
 - MTCA.4 PM manufacturers
 - MTCA.4 MCH manufacturers
